

ΗΕΠΙΞΟΜΕΝΑ - CONTENTS

Burton, P. Microearthquakes and efficiency in crustal deformation in Greece.	11
Papazachos, B. and Papaioannou, Ch. A time and magnitude predictable model for strong earthquakes and its application for long term earthquake prediction in the Aegean area.	39
Karnik, V. Characteristic earthquakes in the Aegean source regions.	61
Tsapanos, T., Papaioannou, Ch. and Margaritis, V. Seismicity and seismic hazard for the city of Florina.	73
Makaris, D., Stavrakakis, G. and Drakopoulos, J. Estimation of strong ground motion acceleration at a site with regard to focal mechanism parameters and different modes of rupture propagation: The Corinth, Central Greece, earthquake sequence of 1981.	84
Stavrakakis, G. and Drakopoulos, J. Source parameters for earthquakes in Greece as inferred from inversion and spectral analysis of teleseismic body waves.	95
Μακρόπουλος, Κ., Θεοδουλίδης, Ν., Μάργαρης, Β. και Βούλγαρης, Ν. Σεισμική επικινδυνότητα στον Ελληνικό χώρο: Ανασκόπηση αποτελεσμάτων-προοπτικές.	114
Karakostas, B., Scordilis, E., Papaioannou, Ch., Papazachos, B. and Mountrakis, D. Focal properties of the October 16, 1988 Killini earthquake (Western Greece).	136
Papazachos, B., Papadimitriou, E., Karakaisis, G. and Tsapanos, T. An application of the time and magnitude predictable model for the long-term prediction of strong shallow earthquakes in Japan area.	146
Karakaisis, G. A microseismicity precursor before the December 21, 1990 earthquake ($M_s=5.9$, Northern Greece).	157
Dimitriou, P., Papadimitriou, E., Papazachos, B. and Tsapanos, T. Global study of the distribution of earthquakes in space and in time by the fractal method.	164
Stavrakakis, G., Kalogeras, J. and Drakopoulos, J. Preliminary analysis of Greek accelerograms recorded at stations of NOA's Network: Time period 1973-1990.	175
Papastamatiou, D., Margaritis, V. and Theodulidis, N. Estimation of the parameters controlling strong ground motion from shallow earthquakes in Greece.	192
Hatzfeld, D., Hatzidimitriou, P., Panagiotopoulos, D. and Makropoulos, K. The strain pattern of the Aegean from microearthquake data.	202
Latoussakis, J., Stavrakakis, G. and Drakopoulos, J. On intermediate term earthquake prediction in Greece based on the algorithm M8.	210
Diagourtas, D., Makropoulos, K., Gariel, J., Wajeman, N., Hatzfeld, D. and Bard, P. Simulation of strong ground motion using empirical Green's function method. Preliminary results from an experiment in Greece.	222

Τόλης, Σ. και Πιτιλάκης, Κ. Σεισμός: Ένας αλγόριθμος για τον υπολογισμό συνθετικών επιταχυνσιογραμμάτων στο βραχύδες υπόστρωμα.	236
Kouskouna, V., Makropoulos, K. and Drakopoulos, J. Determination of source parameters from seismic spectra in central Greece.	248
Pitaraka, A. Lateral heterogeneities and source location effects on SH wave field using finite difference method and double-couple source.	264
Rigo, A., Lyon-Caen, H., Armijo, R., Bernard, P., Makropoulos, K., Papadimitriou, P. and Deschamps, A. Fault plane solutions of microearthquakes and tectonic analysis in the Western part of the Gulf of Corinth (Greece).	275
Panagiotopoulos, D., Papadimitriou, E., Papaioannou, Ch., Scordilis, E. and Papazachos, B. Source properties of the December 21, 1990, Goumenissa earthquake in Northern Greece.	286
Briole, P., Deschamps, A., Lyon-Caen, H., Papazissi, K. and Martinod, J. The Itea (M_s 5.9) earthquake of November 18, 1992. Characteristics of the main shock inferred from body waves and ground displacement analysis.	297
Karakaisis, G., Karacostas, B., Scordilis, E., Kiratzi, A., Diagourtas, D., Papadimitriou, P., Voulgaris, N. and Ziazia, M. The spatial distribution of the aftershocks and focal mechanism of the Galaxidi (Central Greece) earthquake of November 18, 1992.	309
Salamon, A., Hofstetter, A., Garfunkel, Z. and Ron, H. Seismicity of the Sinai sub-plate.	318
